One Stop Medical Center Opens Third Office in Crystal

Edina, MN— Dr. Steven Shu is, once again, expanding his clinic and procedure expertise across the Twin Cities in hopes of providing efficient, low cost, and high quality care to patients throughout the metro area.

Shu, a top office proceduralist in the United States, opened his procedure-oriented clinic—One Stop Medical Center—in Edina one year ago and his second office in Shoreview just four months ago and is extending his clinic's venues. One Stop will open a third office in Crystal on April 1st to give patients additional access to medical care.

Shu, who worked at Northwest Family Physicians (NWFP) in Crystal for the past seven years, will open his third office within NWFP. Not only will he continue to provide all procedure services to NWFP patients, Shu will also open his clinic to other patients from the Northwest corner of the Twin Cities.

One Stop Medical Center specializes in office procedures. Shu has additional expertise in anorectal diseases, skin cancer and other skin lesions, gastroenterology, varicose veins, breast diseases, and other areas. Few physicians in the United States are able to provide the wide range of office procedure services that Shu offers through his clinics. The benefits of this practice model include low cost, convenience, efficiency, one stop and high quality services.

Shu is an assistant professor of family medicine at the University of Minnesota, and he teaches office procedures to resident physicians every week at the Smiley's Family Medicine Residency Program. He performs almost 3000 office procedures every year.

“One Stop Medical Center became the first procedure-oriented clinic in the US. My vision is for this clinic to grow into a procedure institute,” Shu said. “Besides ongoing hemorrhoid care, skin cancer care, and endoscopies services, we are going to offer laser treatment for varicose veins next month.”

One Stop Medical Center is now able to serve the entire Twin Cities area with convenient locations in Edina, Crystal, and Shoreview. With its state of the art technology, such as Electronic Medical Records, E-Visits and correspondence by email, visiting a doctor's office has never been easier or more convenient. In addition to be already low cost of office procedures, One Stop offers another 20% discount for uninsured patients. It also guarantees same week appointments for your convenience and 24-hour appointments for patients with urgent medical needs.
